Fall Arrest Lanyard

Our fall arrest lanyards have 32mm wide 42 kN polyester webbing throughout.

- Unique sewn "rip stitched" energy absorber
- Short energy absorber deployment lengths
- Various lanyard lengths available
- Static strength of +22kN after an arrested fall

N.B. A fall arrest lanyard should always be connected to a suitable anchorage point via the connector and ideally above the user.

We can offer a much larger range of harnesses and lanyards. Please [phone](#) or [email](#) for further details.
